

Medical Mission Trips to Utila, Honduras - 2 per year

Team members fly into San Pedro Sula, Honduras, take a private flight to the island of Utila. We set up a small clinic in an impoverished village on the island that operates from 9am-5pm for three days. The people of this village have limited access to healthcare as the hospital is on the mainland and they lack the financial means to ferry over and receive care. We provide them with anti-parasitics every 6 months, a 6 month supply of vitamins, and any medications or treatments they may need. In addition to pharmaceuticals, we provide wound care supplies, IV supplies, urine testing, pregnancy testing, blood glucose testing, and more. Our medical team usually consists of 15-25 people made up of Doctors, Dentists, NPs, PA's, Nurses, Clinical assistants, interpreters, and sometimes students. The clinic is primarily nurse run and we are in need of MD's, NP's, and PA's to join us on every trip or once a year, if possible.

The final 2 days of the trip are used as vacation time to relax since everyone is typically exhausted from the clinic duties. We usually go snorkeling one day out on the boat, while others go scuba diving if they are licensed. The island is surrounded by the second largest barrier reef! The second day we usually head over to another small island and enjoy relaxing by the beach all day!

Dates: (3 clinic days, 2 relaxing days, 2 travel days/there and back)

2022 Spring Trip: March 29 - April 5

2022 Fall trip: September 13 - 20th

Cost:

\$1400 PLUS air and food (air is usually \$500-800 depending on where you fly from and food is very cheap on the island...bring \$200-300 for food, excursions, and souvenirs). Feel free to fundraise any way you want to cover cost!

If you have any questions or think this is something you or anyone else is interested in doing please email one of our medical trip liaisons:

Amy mcinerneyame@gmail.com Gabe ggarcia8@partners.org

We are ALWAYS looking for new people to travel with us!!
